#### MESSAGE FROM THE PRESIDENT

At its January 8, 1980, meeting, the Board of Higher Education approved FY1981 Operating and Capital Budget recommendations which constitute an 11.3 percent increase over FY1980 projected expenditures of \$1,045.0 million. Recommendations for public universities provide in state-appropriated dollars for FY1981 a 9.8 percent increase over FY1980 projected expenditures. Included are an 8 percent salary increase and an additional 1 percent for increased fringe benefit coverage, funds for a 7 percent general cost increase for goods and services, and 13 to 18 percent for utility cost increases. Also approved were tuition increases of \$2 per credit-hour beginning Fall, 1980 (if approved by BOG). The Board of Higher Education's recommendation for Governors State University's FY1981 operating budget would provide the highest percentage increase received during the last five years. FY1981 state-appropriated operating funds recommended total \$14,619.0 million, a 9.4 percent increase over GSU's FY1980 state-appropriated operating base of \$13,357.1 million. The most significant recommendation included in the BHE's FY1981 budget for Governors State University is the restoration of \$196,800 to GSU's base which had been reduced by the Board of Governors. Several budgetary indicator changes used by the BHE had a major influence on GSU's FY1981 operating budget recommendations: 1) Changes in state-wide average cost calculations that recognized fixed administrative and physical plant costs at public universities shifted GSU's position as an overfunded institution to an institution with per-credit-hour costs at nearly the state-wide average. 2) Increased institutional allocation percentages for instructional activities, and a concomitant increase in headcount and full-time equivalent enrollments demonstrated institutional success in addressing overfunding-underenrollment issues: a) Shifts in institutional allocations since FY1978 have brought GSU's distribution of funds into line with other public universities. Funds for instructional activities have increased from 44.1 percent to 51.0 percent of all state-appropriated funds. At the same time, funds for academic and institutional support functions have decreased from 29.7 percent to 24.9 percent of all state-appropriated funds. b) Headcount enrollments have increased 22.6 percent since Fall 1976, and in Fall 1979 GSU reported a 6.7 percent increase in full-time equivalent students. This increase in FTE was the first after four successive years of FTE decreases. Capital Recommendations: The BHE approved FY1981 Capital funds totaling \$97,400. with recommendations for energy-saving projects, food production and research, and new buildings additions and remodeling of existing facilities. The Board of Governors FY1981 appropriation bill will be submitted to the legislature early this spring. It is my hope that the legislature will see fit to accept and approve the Board of Higher Education's recommendations.
